Proud to call New Jersey home

Founded in New Brunswick in 1886, Johnson & Johnson was the first innovative healthcare company in New Jersey, and we have helped make the state a global innovation powerhouse. Our significant impact on the state's economy and local communities continues today, advancing healthcare in the Garden State and around the globe.

Our Areas of Focus

Johnson & Johnson Innovative Medicine

Innovating with purpose to lead where medicine is going.

 **Oncology:** Advancing innovative therapies with a focus on high unmet needs to treat and intercept disease, with the aspiration to one day cure cancer.

 **Immunology:** Transforming the standard of care for people living with immune-mediated disease, including psoriasis, ulcerative colitis, and Crohn's disease.

 **Neuroscience:** Advancing therapies for serious nervous system disorders to help patients live with greater independence, dignity, and quality of life.

Johnson & Johnson MedTech

Innovating at the intersection of biology and technology.

 **Cardiovascular:** Addressing one of the largest unmet needs in healthcare, with innovative interventional technologies spanning electrophysiology, heart recovery, and coronary/peripheral artery disease.

 **Surgery:** Reinventing procedures through robotics, digital and advanced instrumentation.

 **Vision:** Developing transformational innovations to improve the health of patients' eyes.

Johnson & Johnson

Our New Jersey Community Snapshot

Community & Social Impact

We collaborate with local nonprofit organizations and academic institutions to advance health, well-being, and economic opportunity for New Jersey residents.

400K+

meals and produce generated each year through our work supporting food security initiatives across New Jersey.

\$355M+

to support small businesses helping them grow and thrive in communities throughout New Jersey.

Education & Workforce Development

We help build a strong talent pipeline through strategic alliances, training programs, and career pathways that prepare the next generation of life sciences professionals.

\$1M

contributed to NJBioFutures

accelerating the creation of state-of-the-art training facilities and industry-aligned curricula at Raritan Valley Community College, Middlesex College, and Mercer County Community College.

\$500K+

in scholarships provided to NJ students

pursuing nursing, STEM and health-related fields at colleges and universities across the state.

Support for Healthcare Workers

We provide clinical and educational opportunities that help nurses and community health workers deliver high-quality care to patients in New Jersey.

Key corporate supporter

of the Rutgers School of Nursing-Camden

expanding access to modern simulation-based training and advanced education to prepare first-generation nurses to meet the demands of today's healthcare system.

Founding sponsor

of the Johnson & Johnson Exchange

the central convening space in the New Jersey Innovation Hub at The Helix NJ aimed at fostering collaboration across the state's life sciences ecosystem.

Economic impact estimates are based on an external analysis using the IMPLAN® model (2025 data).
