

About the Janssen Pharmaceutical Companies

At Janssen, the Pharmaceutical Companies of Johnson & Johnson, we're creating a future where disease is a thing of the past. We tackle society's most pressing health challenges, connecting big ideas to the resources we need to make them a reality. Our goal is to advance access to good health for all. By seeking out medical breakthroughs wherever they occur, leveraging internal expertise and embracing external science, we aim to bring the best solutions to the people who need them.

We focus on areas of medicine where we can make the biggest difference:

- Cardiovascular & Metabolism
- Immunology
- Infectious Diseases & Vaccines
- Neuroscience
- Oncology
- Pulmonary Hypertension

With approximately 40,000 employees in more than 150 countries around the world, we rise to the challenge each day in pursuit of a healthier future for every person.

The complex, global healthcare landscape presents new challenges, new diseases and new dynamics. That's why we focus our efforts and resources where the need is high, the science is compelling and where we have the greatest opportunity to save and improve lives. We must work together – across business, academia, governments and society – to lead healthcare's ongoing reinvention. At Janssen, we collaborate with the world for the health of everyone in it.

For Janssen, it is not just about leading innovation and driving medical breakthroughs. We go beyond the medicine by working with patients through the entire process to ensure the best possible experience and health outcomes. We are driven by our belief that "patients are waiting" and there is no time to waste.

For nearly a century, we have fearlessly confronted the world's most devastating and complex diseases. We continue to wage this fight with more strength, determination and expertise than ever before. We are all in until society's most daunting diseases are found only in the pages of history books and good health is in reach for all of humanity.
